## PROFESSIONAL SUMMARY

A highly motivated Computer Science graduate with a strong foundation in Artificial Intelligence, combining analytical problem-solving skills with practical experience in intelligent system development to deliver reliable, efficient, and high-performing solutions that ensure innovation and quality in real-world applications.

## EDUCATIONAL BACKGROUND

|                                                                                                      |                                     |
|------------------------------------------------------------------------------------------------------|-------------------------------------|
| • <b>Bachelor of Computer Science and Engineering (CSE)</b><br><i>Green University of Bangladesh</i> | Graduated 2025<br><i>CGPA: 3.21</i> |
| • <b>Higher Secondary Certificate (HSC)</b><br><i>Gafargaon Govt. College, Gafargaon</i>             | Graduated 2019<br><i>GPA: 4.75</i>  |
| • <b>Secondary School Certificate (SSC)</b><br><i>Gafargaon Islamia Govt. High School</i>            | Graduated 2017<br><i>GPA: 5.00</i>  |

## WORK EXPERIENCES

|                                                                          |                             |
|--------------------------------------------------------------------------|-----------------------------|
| • <b>Software Developer</b><br><i>DataSoft System Bangladesh Limited</i> | September, 2025 – Present   |
| • <b>SQA Intern, Remote</b><br><i>360 Pathshala</i>                      | October, 2025 – March, 2026 |

## CAREER INTERESTS

- **Core Expertise:** AI Engineering, Large Language Models (LLMs), Agentic AI, and Intelligent Automation for scalable, production-ready systems.
- **Applied Research:** Developing LLM orchestration, RAG pipelines, LoRA fine-tuning, and AI agents for enterprise automation and optimization.
- **Long-term Goal:** Lead innovation in trustworthy AI architectures, agentic workflows, and end-to-end AI deployment at scale.

## ACHIEVEMENTS AND AWARDS

- **Vice Chancellor's Award:** Honored with the **Vice Chancellor's Award** on a semester for academic excellence and contribution to university activities.
- **Dean's Award:** Honored with the **Dean's Award** on a semester for academic excellence and contribution to university activities.
- **SEO Certification:** Successfully completed the **Search Engine Optimization (SEO) Course** in **2022**, gaining proficiency in on-page and off-page optimization, keyword analysis, and content strategy to enhance website visibility and ranking.

## LEADERSHIP & VOLUNTEERING EXPERIENCE

- **Organizing Secretary, Green University Prothom Alo Bandhusova:** Served as the **Organizing Secretary** of the Green University Prothom Alo Bandhusova, contributing to event planning, member coordination, and social welfare initiatives within the university community.
- **General Volunteer, Green University Computer Club (GUCC):** Actively participated as a **General Volunteer** in the Green University Computer Club (GUCC), supporting technical events, workshops, and inter-university competitions.
- **General Volunteer, Gafargaon Helpline, Mymensingh:** Worked as a **General Volunteer** for Gafargaon Helpline, assisting in community outreach, awareness programs, and social assistance activities.
- **General Member, Green University Computer Club & Green University Cultural Club:** Engaged as a **General Member** in both the Computer Club and Cultural Club of Green University, contributing to academic, cultural, and extracurricular initiatives.
- **COVID-19 Relief Activities:** Worked on the frontlines during the COVID-19 pandemic, supporting health and relief efforts in the Gafargaon as part of the Gafargaon Help Line emergency response team.

## HOBBIES & INTERESTS

---

- **Hobbies:** AI Experimentation, LLM Fine-Tuning, Building Agentic Systems
- **Likes:** Tackling complex AI challenges, Automating workflows, Collaborating on innovative projects
- **Personal Note:** Avoid overthinking focus on execution and rapid prototyping

## RESEARCH INTERESTS & ACADEMIC FOCUS

---

- **Academic Projects:** Led the **Cloud Computing Web Panel Project** as final year project at Green University of Bangladesh, focusing on server management, virtualization, and resource automation to optimize cloud system efficiency.
- **Core Interests:** Passionate about **AI Engineering & LLMs**, **Agentic AI**, and **intelligent automation**, exploring LLM fine-tuning (LoRA/QLoRA), AI orchestration, RAG systems, and production-ready AI models for scalable enterprise solutions.
- **Technical Proficiency:** Expert in **Python** with **LangChain**, **Hugging Face**, **FastAPI**; experienced in **Spring Boot**, **Docker**, **DevOps pipelines**. Actively building skills in AI system design, vector databases, and end-to-end ML workflows.

## PROJECT EXPERIENCES

---

- **Emergency Ambulance Reservation Software**
  - **Tools:** HTML, CSS, JavaScript, PHP, MySQL
  - Developed a web-based system that enables users to instantly book nearby ambulances using live GPS tracking and driver availability status.
  - Implemented key features such as user and driver login, hospital lookup, real-time location mapping, and emergency booking management.
  - Applied SQA principles by designing test cases, executing functional and non-functional testing, and validating software reliability and performance.
- **Heal Point: A Healthcare Management System**
  - **Tools:** Android Studio, Java, XML, SQLite
  - Built a mobile application that streamlines healthcare operations including lab tests, doctor appointments, and digital health articles.
  - Implemented secure authentication, appointment scheduling, and patient information management using an embedded SQLite database.
  - Focused on user-friendly design, system reliability, and data security through structured testing and iterative improvement.
- **Agentic QA Automation Pipeline**
  - **Tools:** Python, Playwright, TypeScript, MCP, Node.js
  - Designed and built a fully autonomous 5-agent QA pipeline that accepts use case documents (PDF, DOCX, XLSX, PPTX) and automatically generates, executes, heals, and reports Playwright test scripts end-to-end.
  - Implemented sequential agent orchestration — use-case-analyzer → test-planner → test-generator → test-healer → report-compiler — with pipeline state management, context window handling, and auto-resume capability.
  - Integrated Model Context Protocol (MCP) for real browser interaction, with intelligent selector healing, hash-based URL handling, and structured QA reports including defect logs, healing logs, and coverage mapping.

## SKILLS

---

- **Programming Languages:** Python, Java, JavaScript, TypeScript
- **AI & ML:** Large Language Models (LLMs), Agentic AI, Generative AI, LoRA/QLoRA Fine-Tuning
- **AI Frameworks & Tools:** LangChain, FastAPI, Spring Boot, Django, RAG Systems
- **DevOps & Deployment:** Docker, CI/CD, Linux, Git/GitHub
- **Backend & APIs:** REST APIs, API Integration, Automation Testing
- **Soft Skills:** Leadership, Problem Solving, Strategic Thinking, Communication, Teamwork
